

## ENGINE ACCESSORIES

Kraft Power stocks engine, generator, and power system accessories, including control/automation and emissions reduction equipment. Both off-the-shelf and custom designed systems are available. Our experienced team can assist you in finding the best products to upgrade and enhance your engines, and our technicians will seamlessly service your equipment.

### **FW Murphy Production Controls**

FW Murphy Production Controls produces instrumentation and control systems for engine driven equipment. They provide a complete line that includes both standard and custom control systems. Murphy specializes in engine protection systems with alarm and/or automatic shutdown.

Kraft Power provides Murphy product solutions dealing with pressure, temperature, level, vibration, overspeed, and more for engine or electric motor-powered equipment. We offer a full line of controls – everything from sensors to gages to micro-controllers. Applications include stationary and mobile equipment such as generators, compressors, fleet vehicles, and construction equipment.

### **ComAp Engine Controls**

ComAp products deliver command, control, and communication capabilities to your engine applications. The controllers can be applied to a variety of environments, including both marine and land-based machinery. From simple engine and generator controls, to complex multi-unit power generation systems, ComAp provides effective and efficient solutions.

For legacy generators, ComAp can provide control upgrades to prolong equipment life, while adding remote control and monitoring capabilities. Replacement controls systems are available for virtually every generator brand.

# GILL

## Gill Instruments

Gill Instruments designs and manufactures inductive ignition and air-fuel ratio control systems for industrial gas engines. They have a reputation for quality and reliability, used around the world by OEMs of all sizes. Gill engine controls provide a cost-effective solution for challenging gas engine applications.

## Motortech

Motortech offers engine accessories such as ignition controls, gaseous fuel mixers, detonation controls – everything for gas engines. Perfect for complex applications, Motortech's all-in-one control system connects up to 32 generator or CHP units under one system, all functions included, at competitive rates.

## Heinzmann

Heinzmann is a long-established system supplier and development partner of engine management solutions for combustion engines and turbines in the industrial field. Renowned customers trust in Heinzmann products for original fitting and retrofitting of applications that operate in challenging environments and rely on sophisticated and reliable governing, control and emission management solutions.

## Services and Spare Parts

Kraft Power service and support are available for routine and scheduled maintenance and are on call 24/7 for power emergencies. Our experienced technicians are factory-trained and certified to service and maintain peak performance for equipment of nearly all makes and models. Our commitment to your satisfaction is supported by an extensive inventory of manufacturers' genuine parts to ensure maximum uptime for your equipment.
